## Logical Communication Services Inc. Attains Gold Certified Partner Status in Microsoft Partner Program

*Logical Communication Services Inc Further Distinguishes Itself by Earning a Microsoft Competency  
in Advanced Infrastructure Solutions*

Daphne, Alabama — January 4, 2008 — Logical Communication Services Inc, today announced it has attained Gold Certified Partner status in the Microsoft Partner Program with a competency in Advanced Infrastructure Solutions, recognizing Logical Communication Services Inc's expertise and impact in the technology marketplace. As a Gold Certified Partner, Logical Communication Services Inc has demonstrated expertise with Microsoft technologies and proven ability to meet customers' needs. Microsoft Gold Certified Partners receive a rich set of benefits, including access, training and support, giving them a competitive advantage in the channel.

Logical Communications Services, Inc. founded in 1993, is an industry leading, full service systems integrator for the Gulf Coast Area. LCSi specializes in computer network security & support with an emphasis on wireless and IP Telephony Solutions for the financial and health care industries.

"We are extremely pleased to have attained Gold Certified Partner status in the Microsoft Partner Program. This allows us to clearly promote our expertise and relationship with Microsoft to our customers," said Bayne Bridges, President and CEO of LCSi. "The benefits provided through our Gold Certified Partner status will allow us to continue to enhance the offerings that we provide for customers."

"Customers are looking for partner companies that can bridge the gap between their business demands and technology capabilities," said Allison Watson, vice president of the Worldwide Partner Sales and Marketing Group at Microsoft Corp. "They need to trust in a company that can act as an expert adviser for their long-term strategic technology plans. Microsoft Gold Certified Partners, which have certified expertise and direct training and support from Microsoft, can build a positive customer experience with our technologies. Today, Microsoft recognizes Logical Communication Services Inc. as a new Gold Certified Partner for demonstrating its expertise providing customer satisfaction using Microsoft products and technology."

As one of the requirements for attaining Gold Certified Partner status, Logical Communication Services Inc had to declare a Microsoft Competency. Microsoft Competencies are designed to help differentiate a partner's capabilities with specific Microsoft technologies to customers looking for a particular type of solution. Each competency has a unique set of requirements and benefits, formulated to accurately represent the specific skills and services that partners bring to the technology industry.

The Advanced Infrastructure Solutions Competency is designed for partners with proven expertise in designing and/or implementing complex infrastructure solutions such as Active Directory®- and Microsoft Host Integration Server-based design and deployment solutions, and Microsoft Exchange Server migration or deployment solutions. Because customers are increasingly asking to do more with less, partners with the Advanced Infrastructure Solutions Competency can identify their unique skill in helping customers access management solutions, improve operational efficiency and reduce security

risks. Specializations within the competency are Active Directory and Identity Management, Exchange Migration and Deployment, Hosting Solutions, System Management and Storage Solutions.

“Our industry partners allow us to deliver high-quality solutions and applications to our customers. And we’re always looking at ways to improve our relationships,” said Paul Flessner, senior vice president of the Server Applications at Microsoft Corp. “Solutions competencies enable Microsoft to provide resources and training to partners seeking to meet, and even surpass, customer needs. The competencies also provide industry partners with a way to showcase their expertise to customers that depend on them for services, such as building critical infrastructure including storage and hosting solutions.”

The Microsoft Partner Program was launched in October 2003 and represents Microsoft’s ongoing commitment to the success of partners worldwide. The program offers a single, integrated partnering framework that recognizes partner expertise, rewards the total impact that partners have in the technology marketplace, and delivers more value to help partners’ businesses be successful.

LCSI's mission has been to serve the Gulf Coast area as a corporate communications and systems integrator. Named CRN's 43rd Fastest Growing Technology Solutions Provider Nationwide and winner of Mobile's Outstanding Business and Industry award in 2005, LCSI continues to offer the most efficient, cost effective and secure solutions available to date.
